# Faucet Explained

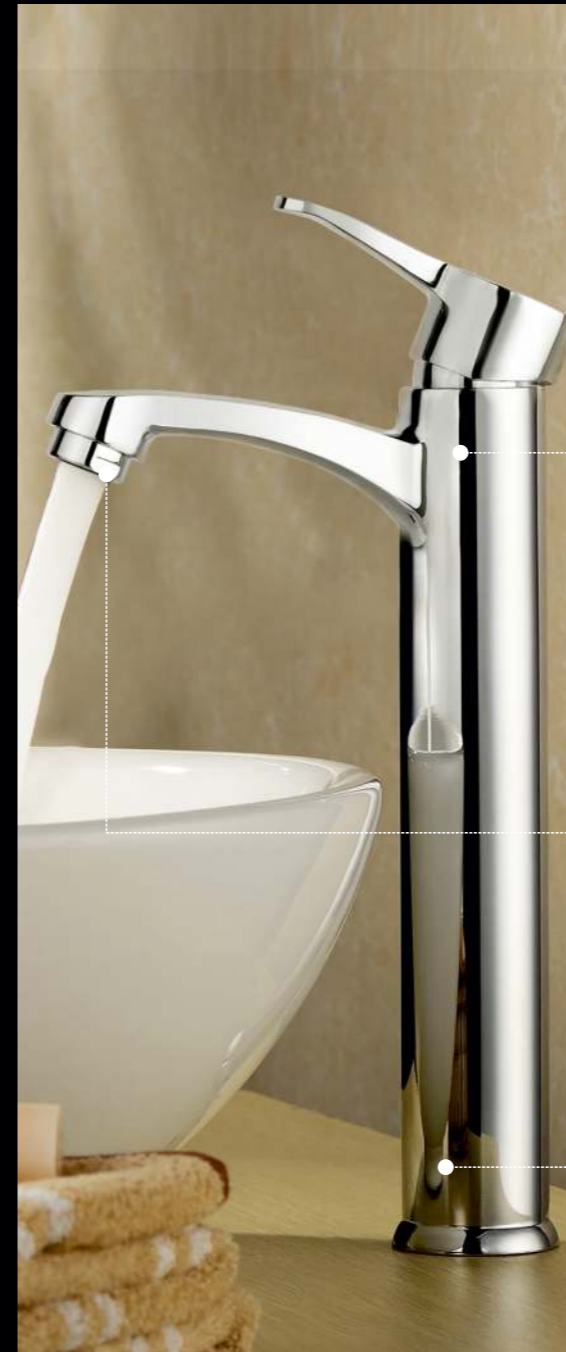

PREMIUM FEATURES

*Living  
With Style...*

## Welcome

a certified manufacturer of faucets We control every step of our production process, from innovation to design to manufacturing By purchasing a product, you can be assured that you are choosing a superior product that was manufactured to the highest standards.

We have our own designer studio and talented team of qualified artist and product designer who create something new, innovative and artistic drawing to inspire us. Their designs and our excellent and craftsmanship meet together and makes masterpiece products.

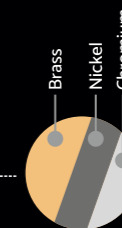

**Ceramic cartridges**  
All Quarter turn ranges are fitted with Japanese technology ceramic disc made with Alumina, known to be the hardest material after diamond.

**Ceramic cartridges**  
All single lever are fitted with European cartridges to ensure outstanding & leaking performance.

**Soft flow Aerator**  
foam flow faucets in all ranges are fitted with world leader, NEOPERL- made in Germany, honeycomb aerators that mix air with water to form a stream of aerated water (foam flow) which does not splash or spill.

**Premium Finish**  
All faucets are made with double plated finish and hand polished to perfection

## HOW To Care

### “DIY” Do-It Yourself

One of the major problems that the households face is the maintenance of taps. Even for a small problem you need to call a plumber and you end up feeling that the taps you purchase are too costly. But the problem will persist even with the leading brands because the water will always have dissolved particles in it and it will always clog the aerator resulting in low flow of water

a leading brand in quality taps brings you the solution. Along with technologically advanced, intelligent designs, value for money and 7 years warranty brings you “Do it yourself” taps. Let’s learn how!

#### Learn how to clean a tap

To keep the exterior finish of our product i.e. chromium plated / coloured surface shining for years, clean it with the help of mild soap & water. Do not use abrasive sponge or scouring agents for cleaning

We also advise you not to use cleaning agents containing solvent or acid, lime scale removers, household vinegar and cleaning agents with acetic acid in them.

Clean taps with a little soap and moist cloth only, then simply rinse off and wipe dry. you can avoid lime spots by drying the fittings each time it is used. After drying you can apply a coat of wax polish to protect the surface from settlement of water for a considerable period of time

#### Learn how to clean the aerator

Because of the dust, minerals and suspended particles, that comes with the water the aerator gets clogged, resulting in low flow of water. The solution is not to remove the aerator but to clean it as it helps you get streamlined and anti-spash flow of water with reduced consumption of water as well.

To clean the aerator first open housing by unscrewing it clock wise, take out the aerator

Wash it with water, clean it and simply attach it again. Here you go steady high flow of water . surely you save a few bucks here.
